Period for Reply -- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

Applicant's election without traverse of Species 1 (Figs. 1-3); sub-Species (Figs. 6A-B), claims 1-4, 6-7 in the reply filed on 5/21/08 is acknowledged.

Claims 5, 8-16 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected Species II, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 5/21/08.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-4, 6-7 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Masaki et al. (JP 11-221276), cited from IDS.

Masaki et al. discloses a medical liquid meter including an container 16, it is well-known in the art to provide the expandable container (such as I.V bag, expandable when it's full of fluid), and it is also well-known in the container/bag art to provide an inlet port for refillable and supplying a medical fluid into the container; a feed duct 28; a weight measuring device 50. It is noted that the weight measuring device is measured using the weight-measuring device, it read a quantify of remaining amount of the medical fluid stored in the container

Regarding claims 2-4, Masaki further discloses the weight measuring device 50 includes a suspender 18 for detecting the weight of the transfusion container 16 (para 0015), a cord-shaped connection member 14.

Regarding claims 6-7, a weight measuring indicator, wherein the weight measuring device is corrected such that the weight measuring indicator indicates a zero point of a scale when no medical fluid

Art Unit: 3763

is stored in the container 16 (see para 0010, or zero reading indicate means 110 of para [0023-0024]); an elastic member/spring 82, 84, 62 serves as a weight gauge.

It has been held that the recitation that element "suspenders", or "a cord shaped connection member" of claims 3-4 is "adapted to/capable of" performing a function is not a positive limitation but only requires the ability to so perform. It does not constitute a limitation in any patentable sense. In re Hutchison, 69 USPQ 138.
